

SU 462

EXTERNAL GAS OUTPUT TORCH FOR AUTOMATION

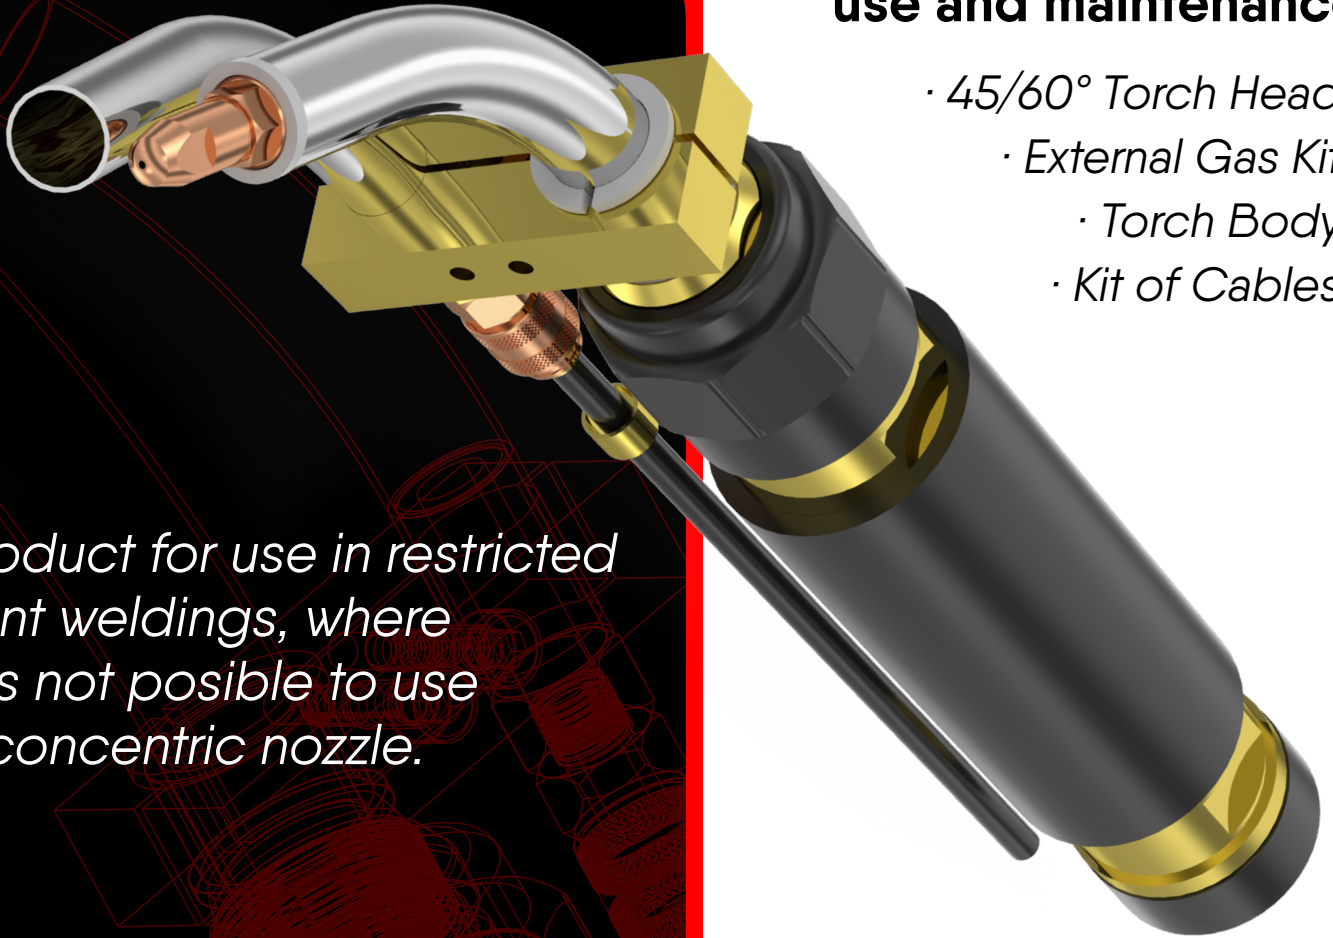

Product for use in restricted joint weldings, where it is not possible to use a concentric nozzle.

Protective gas is driven by a side tube

Torch head doesn't require a gas diffuser, only a contact tip.

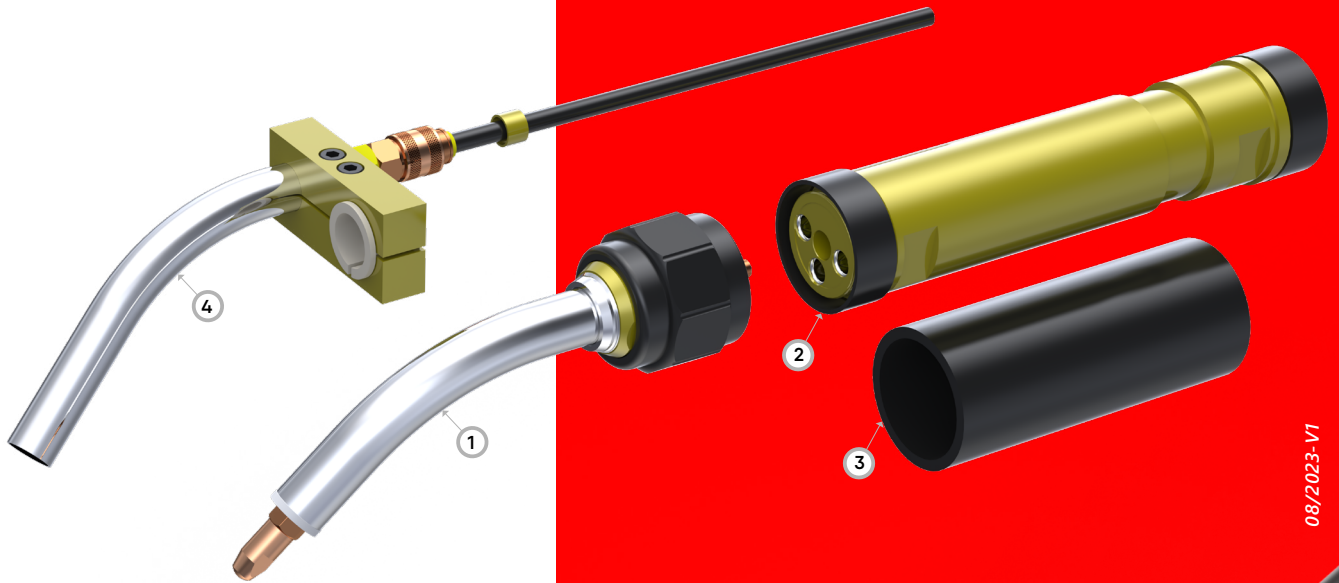

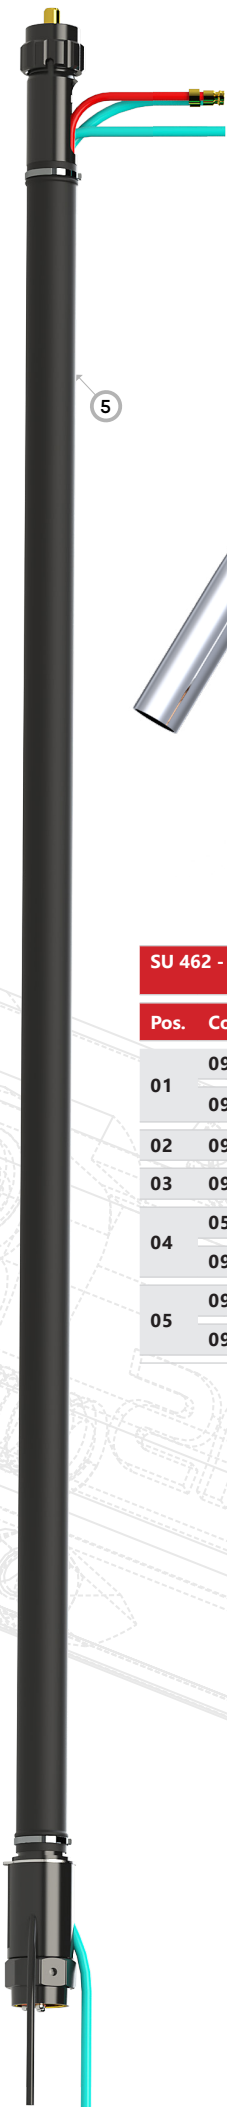

**Torch developed
in four parts,
to facilitate
the assembly,
use and maintenance:**

- 45/60° Torch Head
- External Gas Kit
 - Torch Body
 - Kit of Cables
