

Welding Application with Fume Extraction Torch

Automatic cleaning of the extraction filters

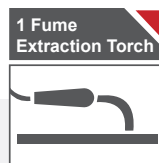

Mobile equipment, allows mobility according to the production line

Extraction for large amounts of welding fumes

Equipment for applications without fixed extraction point, follows the displacement of the welding source

NEW ARCLEANER

The **ARCLEANER** is designed to work with just a single torch;

It allows great mobility and ease of installation. It has a filter with great capacity of particulates retention; it has a box of recollection and automatic cleaning of the filter.

Robust equipment and designed for companies that use heavy welding in their lines. ArCleaner is ideal for:

- Agricultural industry;
- Shipyards;
- Road implements;
- Heavy applications in general.
