*CNC system  
dedicated;*

*Uses plasma source  
conventional*

*Security system  
by Safe Line*

*Suitable for Cutting Carbon  
Steel*

CNC plasma cutting table PRO Series has been developed especially for those who want a low investment allied to high production with low operational cost.

The PRO Series has a low process cost even in thicker sheets, in addition to having robust mechanics and trust.

**Inclusive  
in the  
package**

+

<b>CNC:</b>	Dedicated
<b>Programming software:</b>	Lantek
<b>Motors:</b>	Brushless hybrid motors; duo motorization on the longitudinal axis;
<b>The reduction:</b>	Planetary precision reducers;
<b>Lanes:</b>	Made in "I" beams, mechanized, leads and plains;
<b>Shipping system:</b>	Linear guides and straight zippers
<b>Height control:</b>	0.6 volt resolution
<b>Security:</b>	Security cord
<b>Dimensions:</b>	Define with personalization

## Overview

## Main Characteristics

**Feeder Frequency**

220V ou 380V  
50 - 60 Hz

**Cut Thickness (Carbon Steel)**

Recommended Cut 19 mm

Maximum Cut 25 mm

Separation cut 52 mm

**Current and Duty Cycle**

100A - 80% 90A - 100%  
Amp - %

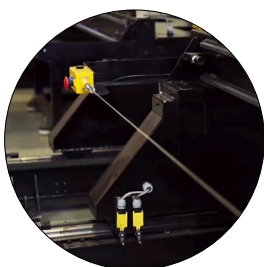

**Average Pressure Compressed Air**  
**Average Flow Compressed air**

5,2 bar

210 L/min

## Standard components

## Optional Components

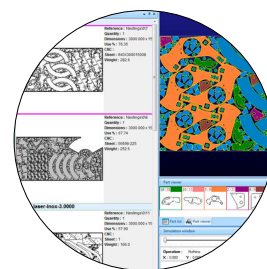

Safe Line Security System

Real Cut I25 Font

Sistema CNC Dedicado

Software Lantek
