

Ready to Weld

Quick installation and ready to weld

Fully mounted on common base, easy to move and change layouts

Fixed table or Optional Ad-On Turntable

Small Footprint

Ready-To-Weld robotic welding system offers the best cost benefit ratio. Designed for welding of medium size parts and where shop space maybe an issue. Increase your productivity easily and quickly, allowing an easy integration with any robot brand and welding inverter.

All inclusive Package

+

+

Tabletop dimensions	26" x 67"
Maximum table load capacity	2204 lb
Maximum cell power requirements	66A
Input Voltage/Current	200V to 460V (three-phase)
Cell Dimensions	79" L x 87" W x 83" H
Weight	1929 lb
Power requirement	26 kVA (according to welding robot and inverter)
Air Requirements/Flow Rate	87 Psi/0.59 Cfm

Measures
