

Ultra-Low Spatters Robotic Welding

1 *Welding with high penetration in thick and medium thickness sheets*

2 *Low thermal load in thin sheet welding*

3 *Wide range of applicable materials*

4 *Technology that provides ultra-low spatters*

Sync between Robot and WB

NEW SYSTEM

SYNCHROFEED is the ultra-low spatters technology welding system. The synchrony between robot, power source and robotic torch allows cost reduction in the process and improvement of welding quality.

Conventional Welding

Welding with SynchroFeed
